

BC - Locating bearing, blind shaft

LC - Non-locating bearing, blind shaft

BP - Locating bearing, passing shaft

LP - Non-locating bearing, passing shaft

- See page 12 for technical features. Standard seal "TS" – radial labyrinth, see page 05.
 - **Should a different type of seal be requested, the dimensions of the column "L" on the table can be modified,** but our engineering department should be consulted for more information.
 - For applications with other bearing series or other shaft diameters, please consult our Engineering Department.
 - **Specification example:** SAF-616-Ø2.11/16"-BP-TS=SAF housing, size 616, made of grey cast iron with 2 holes on the base, prepared for 22316-K bearing and HA-2316 adapter sleeve, for locating bearing and passing shaft, with labyrinth seal type TS.
 - Up to size SAF 617 these housings can be supplied with 4 holes on the base, by simply adding the prefix "F" to the housing designation (Ex. FSAF-617-BP-TS). As of the size 617 the housings will be supplied exclusively with 4 holes on the base. The dimensions of the set bolts for two holes on the base are found on column "S", between brackets.
- When not specified, the housings up to and including SAF 617 will be supplied with 2 holes on the base.
