

BC - Locating bearing, blind shaft

LC - Non-locating bearing, blind shaft

BP - Locating bearing, passing shaft

LP - Non-locating bearing, passing shaft

- See page 11 for technical features
- Standard seal "TC" – felt strip, see page 04. For seal types TA and TG, the dimensions are maintained. **Should a different type of seal be requested, the dimensions of the columns "L", "N" and "M" on the table can be modified**, but our engineering department should be consulted for more information.
- For applications with different bearing types and different shaft diameters please consult our Engineering Department.
- **Specification example:** SNAH-516-BP-TG, for 22216-K bearing = SNAH housing, size 516, made of grey cast iron with 2 holes on the base, prepared for 22216-K bearing and H-316 adapter sleeve, for locating bearing and passing shaft, with TG split nitrile or polyurethane rubber retainer with double lips seal.
- This bearing series can be supplied with solid base in nodular cast iron, with 2 or 4 holes on the base. These housings are identified by the prefix SSNAHD. Use suffix MS1 for two holes on the base and suffix MS2 for four holes on the base. Example: SSNAHD-516-LC-TG-MS2. Please consult our Engineering Department for dimensions and location of the holes.

Housing	d	Bearing	Adapter sleeve	Dimensions (mm)											Ring Dim.	FRB Qty	Weight (kg)
